October 18, 2022

Sub: Transactions of Indian National Academy of Engineering Journal

Dear Prof. Pal,

I am delighted to know that you have been elected as Fellow of INAE for 2022. You have achieved this distinction against very stiff competition. Hearty congratulations to you on this occasion. It is indeed nice to have you within the fold of INAE.

Every year it is a customary practice to publish the research work of newly elected fellows in INAE publications, bringing out their salient contributions in their own field that led to their recognition as a Fellow of INAE. Earlier we used to publish the contributions of the newly elected fellows in 'Annals of INAE'. From 2020 onwards, we are publishing the original technical research/review papers of the newly elected Fellows in the 'Transactions of Indian National Academy of Engineering: An International Journal of Engineering and Technology' (<https://www.springer.com/journal/41403>). This journal is published by Springer Nature and INAE. It has become a popular journal for publication of papers in Engineering Science and Technology. For example, the journal attracted 1,60,000+ downloads in 2021, which is considered as an excellent record.

All the newly elected fellows are invited to submit their valuable original research contributions (co-authors are permitted) to 'Transactions of INAE' by 30 November 2022. The submission is to be made online directly on the journal website given above. The guidelines for preparation of the paper are given on the journal website. The submitted manuscript will go through the standard peer review process, and the accepted papers will be published in 'Transactions of INAE'. On accepting the paper, it will be first published "on line" within a week. The issue will be compiled subsequently.

Looking forward to your valuable original research/review paper submission so that we can bring them together in one issue as early as possible. A line of confirmation from you within a week of receiving this letter would be greatly appreciated.

With best regards,

Amit Agrawal, PhD, FNAE, FNASc, FASc
